

Your Ebury, Your Future

## Ebury Bridge Renewal Updates Archive

### Community Exhibition – 22<sup>nd</sup>/24<sup>th</sup> March 2018

Thank you for joining us at the Scenario Assessment Exhibition and taking the time to view the facts about the scenarios being assessed currently for a renewed Ebury Bridge Estate. We were pleased that many of you were able to come and talk to the team about the future of Ebury Bridge. The information is available at the Regeneration Base if you wish to talk this through with the team. Download the Scenario Boards here (PDF 100KB)

[The scenario boards can be found here.](#)

### Acoustic Surveys – 15<sup>th</sup> December 2017

The Project Team has arranged for a detailed noise and vibration survey at various locations around the estate. This will include installing temporary noise monitors in some of the vacant apartments, taking sample noise measurements at various ground level locations (with a noise meter on a tripod) and taking vibration measurements on the grassed area adjacent to Dalton House. The microphones of the temporary noise monitors will be located outside of the flats (i.e. attached to balcony railing). The monitors will be installed shortly and will be left in place for around one week.

## **Community Design Workshop 2 – 6<sup>th</sup>/7<sup>th</sup> December 2017**

Thank you for joining us to take the design challenge with the team of architects working on the designs for a new Ebury Bridge estate. It was great that so many of you were able to come and talk to the design team about your ideas and thoughts on the future of Ebury Bridge. We really appreciate it in the busy run-up to Christmas.

If you were unable to make the session or would like to have a look at the boards again, you can do by clicking [here](#):

## **Community Design Workshop 1 – 22<sup>nd</sup>/23<sup>rd</sup> November 2017**

Thank you for taking the time to meet with the Design Team, at our first Community Design Workshop, which was held on Wednesday 22<sup>nd</sup> and Thursday 23<sup>rd</sup> November at Ebury Youth Club. Those who attended the workshop were introduced to the Design Team, had the opportunity to talk through the reasons why the previous scheme failed and started to look forward, with the help of the architects, at what a scheme for Ebury Bridge might have. You can view the information boards from the session [here](#):

## **Design Engagement – 1<sup>st</sup> November 2017**

We are now entering the Design Engagement phase of the renewal process. A multi-disciplinary design team has been appointed to work up new proposals for the future of Ebury Bridge and will engage with residents about these emerging proposals. There will be a number of opportunities for the local community to meet and have discussions with the Design Team members.

## **Preparing for the design options – 30<sup>th</sup> October 2017**

As part of preparations for design options you may notice officers on the estate carrying out ground checks. These checks, called topographical surveys, are used to identify and map the contours of the ground. The survey will check slightly above or below the earth's surface (i.e. trees, buildings, streets, walkways, manholes, utility poles and retaining walls). The surveys will take 7 days and officers will need to access the

communal gardens at Donneraile. Please contact 0800 011 3467 if you have any concerns.
