

TOWN PLANNING APPLICATIONS WEEKLY LIST

Week Ending :18 February 2024

CENTRAL AREA TEAM

(Covering the W1 area)

Planning Applications received by the council are set out below.

The Council welcomes comment from neighbours, amenity societies and residents groups as part of its consideration of planning applications and we recommend you do this online at www.westminster.gov.uk/planning.

Please note, some of the applications listed may be incomplete and further plans or information may be required before the application can be dealt with. Only once an application is valid will it be published online for consultation.

Received : 07.02.24 Level : Applic. for works to trees in CA

Address : **22 Sutherland Avenue
London
W9 2HQ** Ward : Harrow Road

Ref. No. : 24/00840/TCA

Proposal : **1 x Lime: fell**

The tree is at the end of the garden of 22 Sutherland Avenue. It is a scraggly tree that must have grown from a fallen seed. It covers my garden with shade and with a sticky honeydew resin which means that the far end of our garden is not useable.

It also covers the gardens of 22 and 24 Sutherland Avenue with shade and sticky honeydew, which is a shame as the children there have their trampoline and swings there and are always having a nice time.

I propose to cut the tree down, so that the gardens to which it gives umbrage can be nicer and grow more flowers and give more happiness to various families of small children.

Since my first mention of this tree being a considerable detriment to the surrounding area many years ago the tree has grown a lot and I would love to be given permission to put the situation to right. Thank you

Ref. No. : 24/00975/TCA

Proposal : **T1 - Lime - tree has been reduced in the past. We would like to apply to reduce the tree beyond the previous reduction points by 2 meters all over due to the following reasons. The tree moves around excessively in inclement weather, it recently dropped a large branch through the garage roof below which could have injured someone if it had hit them.**

The tree is too large for its situation and causes excessive shading over the garden and neighbouring properties.

We would like to crown reduce the tree to 2 meters below its current reduction points to contain the size of the tree, reduce the shading and reduce the mechanical loading on the main unions thereby reducing the chance of future branch failure.

Ref. No. : 24/00458/TPO

Proposal : **We are applying for the removal of two Tilia Europaea's (Lime trees T1 & T2) Due to significant signs of decay and decline.T1 is located at the front left of the property and is semi mature, it has been reduced heavily multiple times previously. A ground inspection of the tree has been undertaken and several cavities are visible (see attached photos) The lowest cavity is located at approximately 2m from ground level and as such, strongly suggests the tree is structurally unsound. In addition to this there is significant crown die back, potential due to the continuous hard reductions over its life span. I have recommended to the client that we apply for removal, for the above stated reasons. T2 is located at the front right of the property and is semi mature, it has also been reduced heavily multiple times previously. A ground inspection of the tree has been undertaken and there is evidence of poor healing unions, bark decay, crown die back, cavities and a significant amount of bark loss. Once again I have recommended removal of this tree because of the above stated reasons and the trees close proximity to the clients house and public highway. I have explained to our client that the local authority may stipulate that they replant, if the removal of T1 and T2 is granted. The trees are located on top of a retaining wall and I've suggested re planting would be viable but only if they're potted, as always we are open to your suggestions and advice.**
